

VIDEO DISTRIBUTION SYSTEM

Abstract of the Disclosure

5 The invention relates to video distribution systems
and, more particularly, to a system that blanket transmits
video/audio content such as movies (for example, via satellite
downlink transmission) to each customer's computer-based
recording, storage and playback system. Customers preselect
from a list of available movies or other content in advance
10 using an interactive screen selector, and pay for only the
video/audio content that is actually viewed.
